

## PHYSICAL ACTIVITIES IN GRAM PANCHAYATS – AT A GLANCE

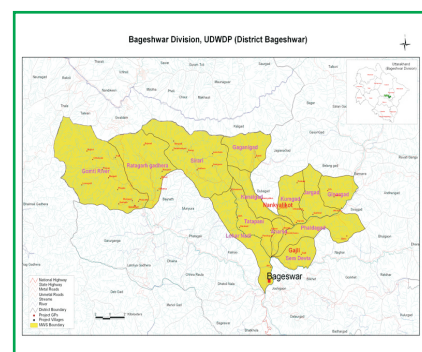

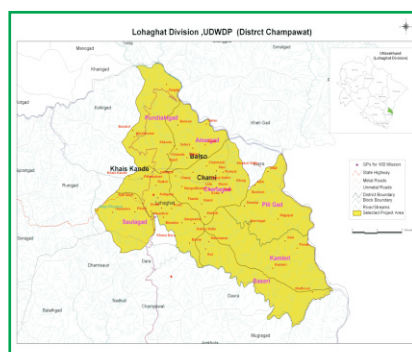

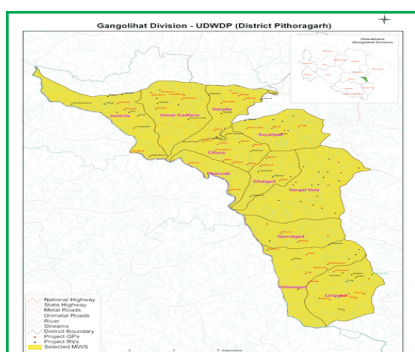

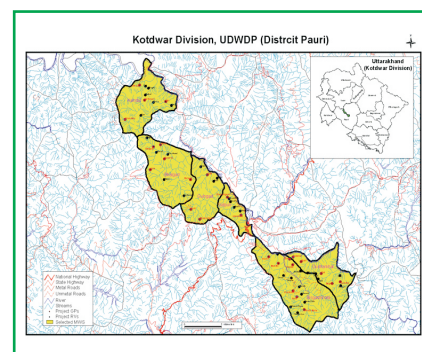

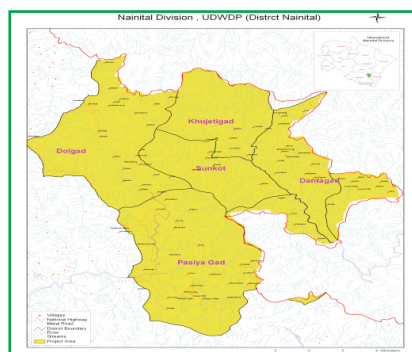

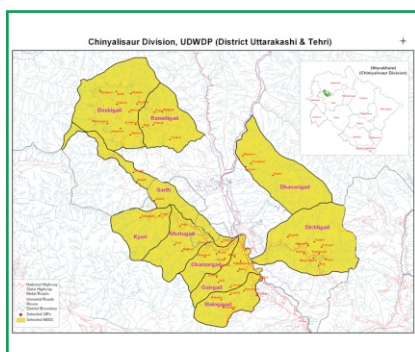

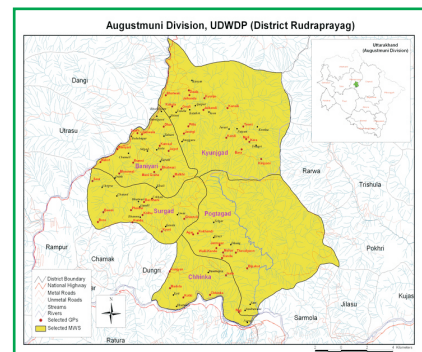

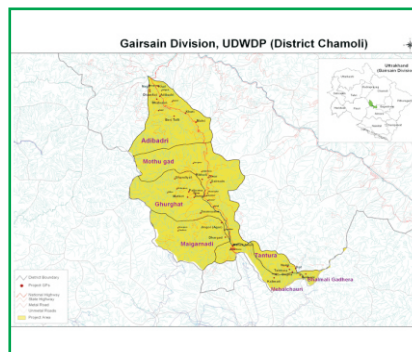

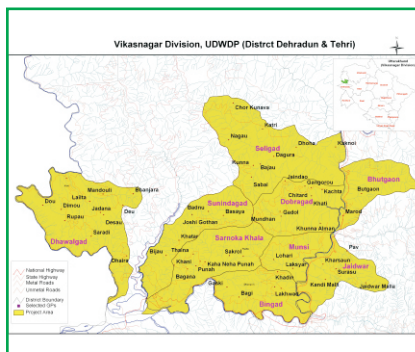

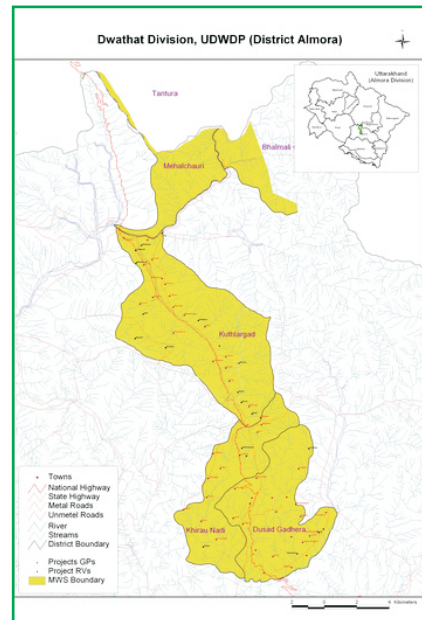

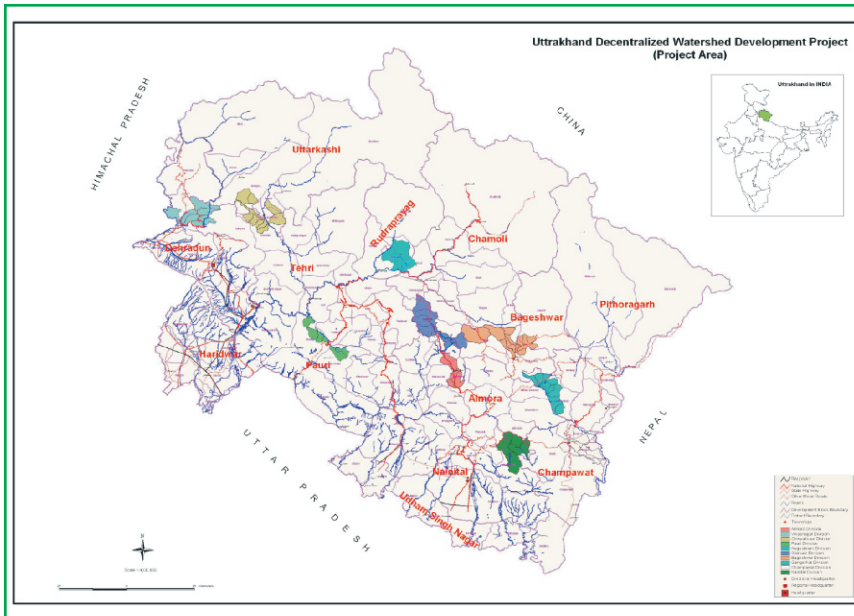

The Utrarakhand Decentralized Watershed Management Project 'GRAMYA' was spread over an area of around 2348 sq Km. in 76 selected MWS in Middle Himalayas. About 468 Gram Panchayats identified in 18 Blocks of 11 Districts participated in the project.

The project involved community in the planning, implementation and monitoring of activities. Gram Panchayat Watershed Development Plans (GPWDP) were prepared for all 468 GPs and works in these GPs were carried out according to these GPWDPs. Project initiated and implemented the proposed watershed activities through community involvements. The capacity development activities done by the project helped to mobilized community to focus on NRM and conservation activities. Major activities carried out by the GPs were plantation of Forest & Horticulture species, soil & water conservation, livestock management, energy conservation, water harvesting, rural infrastructure development and Income Generation Activities for vulnerable groups.

Major demonstration activities under the project viz. compact area demonstration, seasonal, off-seasonal vegetable demonstration and orchard development demonstration were carried out with the help of technical support from VPKAS, Almora and Pant Nagar University.

The detail of major activities, carried out in all selected GPs is given here and it does not represent the total physical achievements of the project.
